10.45 Morning Coffee Break

11.15 Case Study: Raising the profile of the EA profession, and your own role, through advocacy, networks and mutual respect

Caroline McGlynn Tran, Executive Advisor to Chief Information Officer, Ministry of Social Development

As an EA you are hugely valuable to your organisation, but in order to reach your full potential, it's important to advocate for the role of the EA, cultivate authentic and trusting relationships with all your colleagues, gain buy-in and ensure you are working as a team with equally engaged and aligned colleagues.

Age and experience aren't the only things valuable in working relationships. There's always room for a younger employee to teach an older employee valuable lessons - typically on technology or social media issues, and in return more seasoned employees can help the new ones get to grips with when to tweet and when not to tweet. If you view others as trustworthy, and focus on sharing information and collaborating fully, chances are your colleagues will reciprocate and we all thrive. Hear Caroline's perspectives on:

- Leveraging networks to become more effective in your role
- Providing guidance and support to others, whilst understanding what you need to progress your own role
- Boosting your effectiveness by working with equally engaged and aligned assistants toward the same objective
- How aligned teams and networks (virtual or otherwise) can create a new cohesion, and become excellent at all times

11.45 How to future-proof your role, and super-charge your career

Michelle Gibbings, change leadership and career expert and founder of Change Meridian

Executive Assistants are not immune to the role changes that are being generated by the increased use of robotics and automation across workplaces globally. Role change for EA's isn't new, but what is new is the pace and breadth of the impact.

In a world of work which is constantly changing, you can't rely on others to accelerate your career. Each person needs to be the leader of their career. Building a dynamic and progressive career isn't about luck. It's about the decisions that a person makes each and every day. In this session, Michelle will share learnings from her executive career and the interviews she conducted as part of her second book - Career Leap: How to Reinvent and Liberate your Career, as well as insights into the changing nature of the working world. You will be:

- Challenged to think about how you currently manage your career - is it holding you back or getting you fit for the future?
- Introduced to the steps you can take to amplify your success
- Encouraged to make deliberate choices to liberate and future proof your career

12.30 Lunch Break

13.30 Essential Performance - mastering skills for sustained high performance

Shannah Kennedy and Lyndall Mitchell - The Essentialists, leaders in life and wellness education

Known as the 'Thelma and Louise of Wellbeing' Shannah and Lyndall have been operating in the wellness space for over three decades, working with Australasia's blue-chip companies, Olympians and Elite athletes. They know what it takes to be successful in this modern era. They also know that with the right foundation and the right habits, we can truly connect with our better selves, and support our executives, without autopiloting through our life and career. Their essential keynote will help you

- Understand the essentials of stress management - sleep, exercise, mindfulness, neuroplasticity, goal setting and positive mindsets.
- Challenge your time management beliefs - It's not about getting more things done, it's about getting the right things done
- Address your individual core values, and how these relate to your role and your company
- Get off the treadmill of life - How to own who you are and the choices you make - to understand a deeper sense of purpose

14.15 Let's Get Smart: Why financial fitness is key to productivity and freedom

Hannah McQueen - founder and director of 'enableMe', financial personal trainer, and author

Our parents and grandparents only had to be OK with money and they'd be alright, but those default settings will see the current generation worse off than their forebears. We don't do financial literacy very well in this country - but even better financial literacy alone is not enough to combat

the challenges the current generation is up against. 83% of us are financially stressed - so it's not just about earning enough! Finances are the leading cause of insomnia in women and most retirees have run out of money within 10 years.

We're not in control and we don't have the tools to change - but Hannah McQueen does. She's literally written the book on finding The Perfect Balance, and one on killing your mortgage and sorting retirement, (not to mention the one about raising financially capable kids) and she's helped thousands of clients take back the reins and sleep at night knowing they're on track. Don't miss this opportunity to take the reins of your own finances, learn how to empower your staff, and become financially savvy for the future.
