13.45 Versatile leadership: building strategic self awareness

Rob Hoult

Knowing ourselves and how others experience us lies at the heart of leadership effectiveness. As an emerging leader, we must understand how our behaviours and actions influence others around us, whether this be colleagues, direct reports, our immediate manager as well as our friends and families.

All of these people get to experience 'us' and we want to be sure that they are getting the best version of us, and the version of us that brings out the best in them.

Whether we are an emerging leader or experienced CEO, we must know when to play to our strengths, and when to reign them in. It also means knowing when and how to move into the areas that we are less comfortable with. In essence, we must know how to be versatile in our leadership behaviour, and be able to call upon multiple 'styles' of leadership. We must avoid allowing ourselves becoming trapped in a singular style of leadership that is shaped by our personality or preferred behaviours.

Rob Hoult has built a reputation for his ability to engage with a diverse range of leaders, teams and organisations through his leadership workshops, coaching and consulting, and in this session, he will help you develop the ability to be strategic with your self-awareness. You will discover that becoming a versatile leader is achievable when you know yourself, and know what others need from their leaders. We'll cover:

- Your core drivers of behaviour and how others see you
- How your personality shapes your unconscious leadership style
- The fundamental needs of all humans and the role leaders play in meeting these needs
- The critical role of trust in building relationships, and the behaviours that generate trust
